

Organic crystals, liquid crystals and polymers (Landolt-Bornstein: Numerical Data and Functional Relationships in Science and Technology - New Series)

Part of a complete new edition on ferroelectrics, Landolt-Bornstein volume III/36, this sub-volume (III/36C) covers organic crystals, liquid crystals and polymers. The other two sub-volumes cover: oxides (III/36A) and inorganic substances other than oxides (III/36B).
